

MIRA HOME OFFICE COLLECTION

Mahogany is the most prized wood in furniture making because of its consistency, color and beautiful grain.

No mahogany grain is more beautiful than the pattern that comes from compression areas on a tree where a large branch and the tree trunk come together. Called *CROTCH MAHOGANY*, the pattern resembles a flame or a feather.

On the Mira home office collection, *CROTCH MAHOGANY* graces the tops of frames and fronts of doors and drawers accenting the beauty.

Over time the compression is relieved *creating some cracks and texture like one will see on fine antiques*. That's the natural process of *CROTCH MAHOGANY* aging and is part of the beauty of that prized wood...*ENJOY!*
